The Problem	3
The Solution	4
How it Works	5
Use Cases	6
Market Size	9
Why Now	13

The Problem

- 1 Billions lack smartphones/internet → excluded from the AI revolution.
- 2 In Nigeria alone, ~100M people are underserved digitally.
- 3 Knowledge gap = poverty trap → no access to instant answers for health, farming, jobs, etc.

Backed Analysis: [Watch Here.](#)

The Solution

- 1 A toll-free AI number.
- 2 Call in your own language → ask → get instant AI answers.
- 3 Works with basic phones (feature phones).

My child is sick, what do I do?" → clear step-by-step guidance in Hausa.

How it Works

Any Phone. Any Language. Any Problem. Solve Instantly

1

Call free number → speech-to-AI in local language → AI response → spoken back.

2

Offline-friendly with telco partners.

3

Designed for **voice-first societies**.

Use Cases

**Health:**

Maternal care, First aid & emergency response, malaria prevention & more.

**Farming:**

Weather tips, pest control.

**Jobs:**

Learning skills, financial literacy.

**Everyday life:**

Government info, rights, education.

**Rights & Safety:**

What to do if arrested or harassed by police, Report violence or abuse.

Market Size

TAM:

3B+

3B+ people offline/low-connectivity worldwide.

SAM:

500M

500M+ in Sub-Saharan Africa.

SOM (Start)

100M

100M in Nigeria.

Massive global inclusion market.

Why Now?

1

Explosion of LLMs → costs are dropping.

2

Governments, NGOs, UN push for AI inclusion.

3

Telcos looking for social impact projects.

Business Model

Phase 1: Immediate Revenue (Now – 1 yr)

- **Nigeria Pilot, 5m+ toll-free calls**
- **Telco Partnerships** → Revenue-share on toll-free calls
- **NGO/Gov Sponsorships** → Funded programs in health, education, agriculture
- **User Micro-Subscriptions** → \$1-\$2/month for premium access

Phase 2: Scaling Revenue (1–3 yrs)

- **Enterprise SaaS/API Revenue** → APIs for banks, health orgs, governments
- **Data Insights** → Sell anonymized trend reports (health, climate, literacy)
- **Sponsor Marketplace** → Brands & telcos pay to reach this audience
- **Pan-Nigeria Scale**

Phase 3: Network Effect Flywheel (3–5 yrs)

- **Pan-Africa Expansion** → 100m+ Users, multi-sector integrations
- **User Growth Loop** → More calls = richer data = higher enterprise pricing
- **Reward Layer** → Airtime, points, tokens (sponsored by telcos & partners) = daily stickiness
- **Super-App Expansion** → Jobs, micro-loans, insurance, remittances all plugged into same AI phone backbone

Every call fuels growth → Every user adds value → Every partner pays more. . That's how this becomes a \$1B+ company.

Traction

(Early-Stage, Building Quietly)

Prototype built:

Working toll-free AI call flow tested internally

NGO/Policy interest

Informal talks with local health/education NGOs

Tech backbone ready

Multi-language AI pipeline functional

We are in a quiet building stage — deliberately focused on strong infrastructure and partnerships before going wide. Our traction today is foundational, and our next 6–12 months are about scaling pilots into national deployment.

Impact (UN/Gates angle)

SDGs alignment:

- 1 SDG 3 (Health)
- 2 SDG 4 (Education)
- 3 SDG 9 (Innovation)
- 4 SDG 10 (Inequality reduction)

Impact (Per 1,000 Calls)

- **3–5 lives** saved through timely health guidance
- **20 jobs enabled** via market & skills info
- **50+ families** supported with access to vital services

Why This is Hard to Copy

1

Language Data Moat

First-mover in Hausa, Yoruba, Igbo, Pidgin AI pipeline. Proprietary training data.

2

Telco Distribution Moat

Toll-free integrations with MTN, Airtel, Glo → mass reach.

3

Network Effects

More calls → richer local data → stronger enterprise SaaS + NGO demand.

4

Brand Trust

First platform positioned as “Africa’s AI for Everyone, Everywhere.”

Competitive Adv.

Competitor	Model / Focus	Reach	Limitations
1-800-CHATGPT (OpenAI)	Toll-free ChatGPT line (US only)	US-Only	Not localized, not multilingual, no African presence
Viamo	AI-backed phone service in Africa & Asia	20+ countries	Health-only, donor-funded, not multi-sector
Callin.io	Callin.io	Global (B2B)	B2B focus, not built for mass access or social impact
PATH x Viamo	Generative AI voice hotline for health workers	Nigeria pilot	Niche (health workers only), still experimental
👉 Us	Toll-Free AI Infrastructure for health, jobs, education & many more	Pan-Nigeria → Africa-wide	Unique Advantage: First *multi-sector, toll-free, telco-integrated AI platform for the next billion Realistic Limitation: Early-stage rollout, requires telco/NGO partnerships

We are early-stage — but building with clarity, urgency, and scale in mind.

Use of Funds

1. Technology & AI Infrastructure – 35%

- Build & scale LLMs optimized for African/local languages
- Voice/NLP toll-free integrations
- Security & uptime for millions of daily calls

2. Telco & NGO Partnerships – 20%

- Revenue-share agreements with telcos
- Joint programs with NGOs & governments
- Subsidies for toll-free access at scale

3. Team & Talent – 15%

- Build & scale LLMs optimized for African/local languages
- Voice/NLP toll-free integrations
- Security & uptime for millions of daily calls

4. Growth & Adoption – 20%

- Community outreach (markets, rural areas)
- Brand & trust-building campaigns
- Onboarding millions onto toll-free AI

5. Regulatory & Expansion – 10%

- Compliance with health/financial regulations
- Expansion to other African & emerging markets
- Early groundwork for super-app ecosystem
- Legal

Unlocks:

- **2 major telco partnerships** signed
- **10 NGO/government programs** launched
- **5M+ toll-free AI calls** within **12 months**

Path to Scale & Revenues

Year 1 (Pilot)

Revenue: \$0.3M

Drivers: NGO pilots, initial telco revenue-share

Year 3 (Pan-Nigeria)

Revenue: \$10M+

Drivers: Telco revenue-share, enterprise SaaS, data insights

Year 5 (Pan-Africa Expansion)

Revenue: \$50M+

Drivers: Multi-country telco integrations, sponsor marketplace, super-app ecosystem

💡 Unit Economics Example:

Avg call subsidy: \$0.02

NGO/Gov funding per user: \$0.20–\$0.50

Telco revenue-share margin: 25–30%

We are in a quiet building stage — deliberately focused on strong infrastructure and partnerships before going wide. Our traction today is foundational, and our next 6–12 months are about scaling pilots into national deployment.

Vision

//

To connect every human
to AI, regardless of device,
income, or language.

Long-term: The AI helpline of the world.

Ask

Raising **\$300,000** for pilot + scale.

Immediate need: Funding for **telco deals, infra, 3 engineering team, local language research team** and **language data training.**

Join us in building the most inclusive AI system in history.
